

Line 3 IAMC Overview

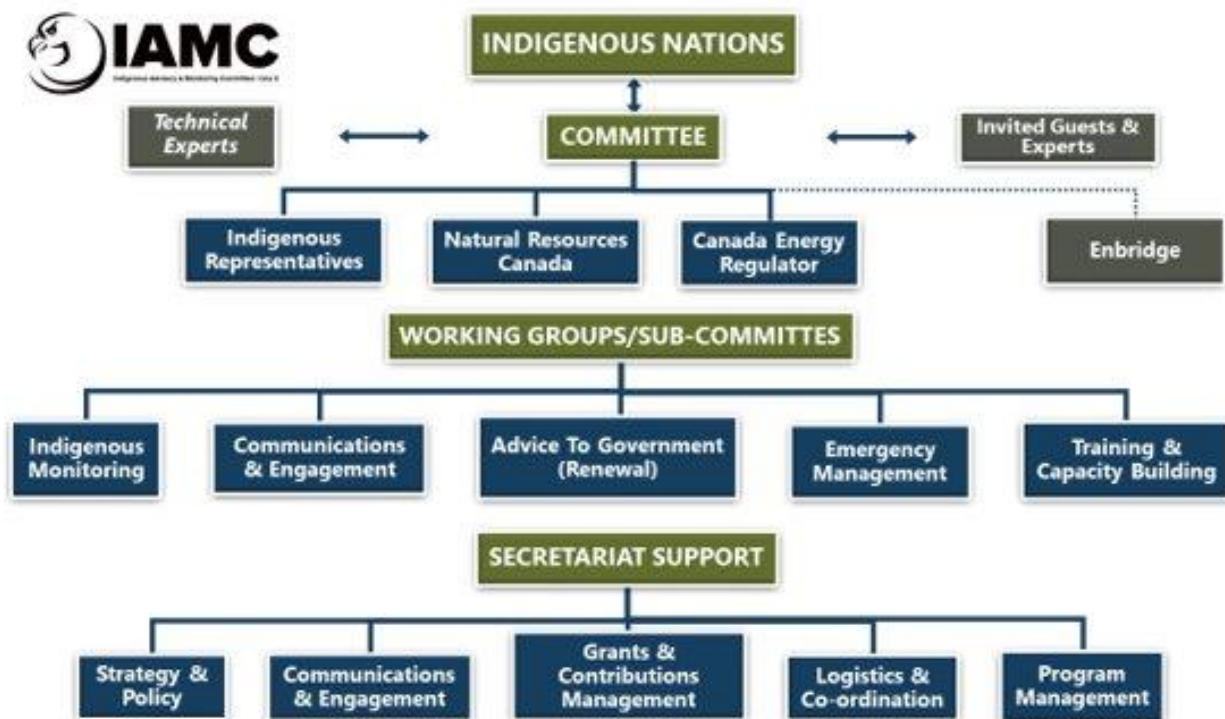

Who We Are

The Line 3 Indigenous Advisory and Monitoring Committee (Line 3 IAMC) was established in 2017 to provide a forum for Indigenous Nations, the Government of Canada, and the Canada Energy Regulator (CER) to engage in dialogue in respect of the Enbridge Line 3 Replacement Program (L3RP).

Line 3 crosses territory of Treaties 1, 2, 4, 6, and 7 and the homeland of the Métis, potentially impacting over 100 Indigenous Nations along the pipeline corridor. Over 90% of the project is built on what is today private land.

The L3RP replaces 1,070 km of the 50-year-old Line 3 with new pipeline and associated facilities from Hardisty, Alberta to Gretna, Manitoba. Line 3 is a \$5.3 billion investment and is the largest project in Enbridge's history. The project includes decommissioning of the old line. This is the largest decommissioning in Canada's history.

The Committee is formed by 16 Indigenous members representing 100 First Nations and Métis Nation Regions across the Prairie Provinces (Alberta, Saskatchewan, and Manitoba), one Natural Resources Canada representative and one CER representative.

What We Do

The Line 3 IAMC is an innovative forum to ensure collaborative, inclusive, and meaningful Indigenous involvement and perspectives are included in activities related to major resource projects.

Through this Committee, Indigenous Nations have the opportunity to provide advice to the Government of Canada and regulators.

Specifically, the Committee provides collaborative and inclusive Indigenous involvement in the review, monitoring, and reporting of environmental, safety and socioeconomic aspects related to L3RP activities over its lifecycle, with meaningful and adequate consideration of traditional land use, sacred sites, historical knowledge, and the diversity of Indigenous traditional and cultural worldviews.

Terms of Reference

“The Committee will form the basis of an enhanced relationship between Indigenous Nations, the Government, and the Canada Energy Regulator (CER) in respect of Line 3 Replacement Program (L3RP) Activities. Through communication and engagement, the Committee will provide for collaborative and inclusive Indigenous involvement in the review, monitoring, and reporting of environmental, safety and Socio-Economic aspects related to L3RP in their lifecycle, with meaningful and adequate consideration to traditional land use, sacred sites, historical knowledge, and the diversity of Indigenous traditional and cultural worldviews.”
