

Line 3 Indigenous Advisory and Monitoring Committee

Established in 2017, the Line 3 IAMC brings together First Nations, Métis, federal regulators, and industry representatives to strengthen Indigenous participation in pipeline oversight, safety, environmental protection, and emergency management.

KEY ACCOMPLISHMENTS

Indigenous Monitoring

- Established and advanced the Indigenous Monitoring program.
- Indigenous Monitors participate alongside regulators in inspections, compliance verification, and oversight activities.
- Increased Indigenous presence and perspectives in pipeline monitoring and regulatory activities.

Regulatory Leadership

- Developed 55 recommendations to improve Indigenous participation in the natural resource sector.
- Provided advice on regulatory modernization, emergency management, Indigenous rights, and implementation of UNDRIP-related initiatives.
- Helped strengthen relationships between Indigenous communities, regulators, and industry.

Community Capacity Building

- Developed the Training for Indigenous Regulatory Involvement (TIRI) program.
- Published the Wise Practices Report to share community-informed approaches and lessons learned.
- Published an Emergency Preparedness Report informed by Indigenous communities across the Line 3 corridor.
- Launched the Emergency Management Planning Initiative (EMPI) to support community emergency preparedness and planning.
